SUMMARY

Full-stack engineer with eight years of professional experience shipping React and TypeScript products, Node.js and NestJS services, and REST APIs in complex domains including financial transaction systems and regulated healthcare platforms. Proven track record building secure authentication and role-based access on the frontend, driving automated testing in CI/CD (Playwright, Jest), and owning end-to-end delivery in an Nx monorepo with Docker and GitHub Actions. Seeking to contribute deep frontend expertise and pragmatic backend ownership to scalable, compliance-minded fintech infrastructure.

CORE COMPETENCIES

- **Frontend:** React, TypeScript, Next.js, Vue.js, Redux, React Query, Radix UI, Tailwind CSS, responsive and accessible UI, design systems
- **Backend & APIs:** Node.js, NestJS, REST APIs, JWT and RBAC integration, GraphQL (production use)
- **Data:** PostgreSQL, pgvector, Prisma, MongoDB
- **Quality & Ops:** Jest, Enzyme, Playwright, Storybook, ESLint, GitHub Actions, Docker, Docker Compose, AWS, Heroku
- **Domains:** Banking and settlement workflows, clinical and compliance-sensitive software, civic data and AI-assisted products

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Led migration of a clinical trial data connectivity product from **Vue.js** to a **React Chrome extension**, maintaining the legacy app while shipping the new client in parallel.
- Implemented **JWT-based authentication**, refresh flows with HTTP-only cookies, and role-based UI with close coordination to backend teams on permission models for a regulated environment.
- Co-developed a full-stack **Next.js RAG chat widget** using OpenAI, LangChain, Vercel AI SDK, and Chroma, with embeddable real-time querying for external data sources.
- Standardized on **Redux** and **React Query**, refactored class components to functions, and introduced a React and Radix UI design system for consistency and accessibility.
- Raised release quality with **Playwright** in CI, Allure Reports published to GitHub Pages, and Slack notifications with test links on every push.
- Optimized performance through lazy loading, code splitting, CDN asset delivery, Lighthouse and DevTools profiling, and responsive layouts with memoization.
- Mentored two junior developers (interns) on React practices and code review standards.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led **React and TypeScript** UI delivery in partnership with architects, achieving a **25% boost in user engagement** and accelerating development by **30%** through scalable frontend architecture and tighter backend integration.
- Introduced **Jest** and **Enzyme**, which led to a **20% decrease** in bug reports.
- Utilized **Storybook** for documenting React components and supported agile practices for requirements, estimates, and work planning.
- Drove a **40% improvement** in React application performance by optimizing caching mechanisms, and reduced bundle size 30-40% with rollup-plugin-visualizer and webpack-bundle-analyzer, contributing to **35% faster load times** and smoother runtime across devices.
- Established ESLint, Prettier, Husky, lint-staged, and **GitHub Actions** for code quality and faster CI/CD.
- Mentored junior engineers on React patterns and sustainable code structure.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of three frontend engineers to build a high-volume **bank Settlement Solution**, significantly enhancing transaction processing to handle thousands to millions of transactions daily, boosting transaction settlement rates by **80%**.
- Spearheaded development of MasterCard, VISA, Express-cash, and e-commerce modules using **React with Redux, RxJS** for data streaming, and **Axios** for asynchronous API requests.
- Developed a real-time account reconciliation solution, boosting reconciliation of daily transactions by **60%** through transaction processing and data management strategies.

- Adopted the native browser **EventSource API** for real-time data streaming, replacing conventional socket.io methods for faster data updates and a more responsive interface.
- Built management dashboards with react-chartjs and Ant Design, with role and permission management via Redux Toolkit.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient **MongoDB** models and schemas with the business team to keep technical work aligned with product needs.
- Developed **Node.js RESTful APIs** with a focus on testable, maintainable, and well-documented code for new product features.
- Converted Figma designs into reusable **React** components for a consistent user interface and clear handoff from design to implementation.
- Engineered **CI/CD** for automated API deployment to Heroku testing environments and **AWS** production, and mentored two interns on frontend and backend delivery.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Worked with a team of five to develop SureEdu, a school management portal for school owners covering staff (attendance and payroll), students (attendance, exams, reports), and guardians.
- Designed **MongoDB** schemas and implemented them in **Node.js** for multiple applications, converting user use cases into database models.
- Handled server-side application logic and frontend integration, with documentation covering features, functions, and capabilities for each application.
- Tested user-defined functions, triggers, and API endpoints to validate behavior before release.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for budget analysis and transparency.

- Architected the platform as an **Nx monorepo** with six applications: **NestJS API, Next.js citizen app, Next.js admin app**, NestJS ingestion pipeline, Next.js marketing site, and Remotion video service, coordinated via pnpm workspaces.
- Delivered a multi-agent AI pipeline with Mastra (five specialized agents), hybrid RAG (**pgvector** plus BM25 with reciprocal rank fusion), Cohere reranking, and Voyage AI embeddings across 708K+ vector chunks from 700+ budget documents.
- Implemented **SSE streaming** for chat with keepalive heartbeats, token-budgeted context, and **PostgreSQL 16** schema with **Prisma v7** including custom migration handling for operational tables.
- Shipped phone OTP and Telegram OAuth, shareable public conversations with SSR, Open Graph and JSON-LD SEO, and a Telegram bot with webhooks.
- Established CI/CD on **GitHub Actions** with **Playwright** across four projects and **Docker Compose** production deployment with health checks, memory limits (API 1GB, ingest 4GB, Postgres 2GB), and 30s graceful shutdown.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
