SUMMARY

Frontend engineer with 8+ years building complex React and TypeScript applications for regulated industries, data-heavy workflows, and AI-assisted products. Proven track record shipping end-to-end interfaces, from performance tuning and design systems to production auth, testing in CI, and collaborative work with backend and ML stakeholders. Based in Berlin, seeking hybrid roles where strong UX, clean code, and measurable user impact matter.

CORE COMPETENCIES

- **Frontend:** React, TypeScript, Next.js, Vue.js, Tailwind CSS, Radix UI, responsive UI
- **State & data:** Redux, React Query, Zustand, RxJS, REST integration
- **Quality:** Playwright, Jest, Enzyme, Storybook, ESLint, GitHub Actions
- **AI product UI:** RAG systems, LangChain, OpenAI API, streaming UX
- **Performance:** Lighthouse, React Profiler, code splitting, bundle optimization
- **Collaboration:** Agile delivery, mentoring, prototyping without heavy specs

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting and transferring clinical trial sites' data to upstream EHR systems, migrating from a **Vue.js** web application to a **Chrome extension built in React**.
- Maintained and extended the existing Vue.js codebase during migration, fixing bugs and shipping features in parallel with the React rebuild.
- Improved application performance using lazy loading, code splitting, and image optimization, cutting load times and strengthening responsiveness with memoization, CDN-backed assets, and profiling with **Lighthouse** and Chrome DevTools.
- Implemented **JWT-based authentication** and authorization on the frontend with HTTP-only cookies, login and signup flows, role-based access control, protected routes, and token refresh aligned with backend engineers.
- Introduced **Redux** and **React Query**, refactored legacy React from class to functional components, and streamlined the build pipeline for better developer experience.
- Ran **Playwright** end-to-end tests in CI/CD, published Allure Reports to GitHub Pages, and sent Slack notifications with test links on every push to raise stakeholder confidence.
- Co-developed a full-stack **Next.js chat widget** backed by a RAG stack using OpenAI GPT models, LangChain, Vercel AI SDK, and Chroma, letting users embed the widget, connect data sources, and query data through a conversational UI.
- Architected a reusable **React and Radix UI design system** that improved consistency, accessibility, and team velocity across products.
- Mentored two junior developers (interns), supporting code quality and delivery practices.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led design and implementation of an intuitive **React UI** that delivered a **25% increase in user engagement** while partnering with architects on scalable frontend architecture, seamless backend integration, and about **30% faster development velocity**.
- Introduced **Jest** and **Enzyme** for automated testing, contributing to a **20% reduction** in bug reports.
- Used **Storybook** for component documentation, clarifying change management and supporting agile planning, user stories, and estimates.
- Drove roughly **40% improvement** in React application performance by optimizing caching, with render profiling via **React Profiler** and Lighthouse.
- Reduced bundle size by **30-40%** using rollup-plugin-visualizer and webpack-bundle-analyzer and achieved about **35% faster load times** after resolving render bottlenecks.
- Established team standards with ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions** for stronger CI/CD and fewer production errors.
- Mentored junior engineers on frontend best practices and consistent design implementation.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Helped a three-person frontend team build a high-volume bank settlement platform that processes large daily transaction volumes and contributed to an **80% improvement** in settlement rates.

- Built modules for MasterCard, VISA, Express-cash, and E-commerce flows using **React, Redux, RxJS, and Axios**.
- Developed a real-time account reconciliation solution that improved daily reconciliation throughput by about **60%**.
- Adopted the native **EventSource API** for streaming updates instead of socket.io for faster updates and a more responsive UI.
- Delivered React and react-chartjs dashboards with Redux Toolkit and Ant Design, including role and permission management.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into database models and collaborated with the business team on technical fit.
- Built **Node.js RESTful APIs** with a focus on testable, documented endpoints that supported new product features.
- Implemented Figma-driven **React components** for consistent user journeys across the application.
- Engineered **CI/CD** for automated API deploys to Heroku test environments and AWS production.
- Mentored two interns across frontend and backend work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** schemas and implemented them in **Node.js** for multiple applications.
- Worked in a five-person team on SureEdu, a school management portal covering staff, student, and guardian workflows including attendance, payroll, exams, and reporting.
- Owned server-side application logic and integration with the frontend for key features.
- Produced documentation for applications and tested user-defined functions, triggers, and API endpoints.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking.

- Built the platform as an **Nx monorepo** with six applications, including **NestJS APIs, multiple Next.js frontends**, document ingestion, Remotion video service, and pnpm workspace orchestration.
- Shipped a multi-agent system in Mastra with specialized analysts, staged intent classification, and RAG-driven answers.
- Implemented hybrid search (pgvector, BM25, reciprocal rank fusion, Cohere rerank) and Voyage AI embeddings for retrieval quality.
- Delivered a **Next.js** citizen app with React 19, Tailwind v4, and Recharts, including dozens of chart types, dark mode, and SEO-oriented public pages.
- Configured **GitHub Actions CI, Playwright** coverage across web and mobile viewports, and **Docker Compose** production deployment with health checks and resource limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
