SUMMARY

Full-stack software engineer with 8 years of professional experience building scalable fintech and data-heavy applications using Node.js, NestJS, React, and TypeScript. Proven track record of delivering end-to-end features across multiple codebases in complex domains, including high-volume bank settlement systems and regulated enterprise platforms. Adept at bridging frontend and backend tasks, with deep experience deploying containerized services via Docker and managing infrastructure in CI/CD pipelines. Seeking to bring strong product ownership and technical rigor to Shine's Expenses and Accounting domain.

CORE COMPETENCIES

- **Backend & APIs:** Node.js, NestJS, REST APIs, PostgreSQL, Prisma, MongoDB, JWT Authentication
- **Frontend:** React, TypeScript, Next.js, Redux, React Query, Tailwind CSS, Radix UI
- **Infrastructure & DevOps:** Docker, Docker Compose, GitHub Actions, AWS, CI/CD Pipelines, Nx Monorepos
- **Quality & Testing:** Playwright, Jest, Enzyme, ESLint, Storybook, Lighthouse
- **Domains:** Banking and Settlement, Accounting workflows, Regulated Enterprise Software

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer (React / TypeScript) *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting and transferring clinical trial sites' data to various upstream EHR systems, migrating from a Vue.js web application to a Chrome extension in **React** and **TypeScript**.
- Implemented **JWT-based authentication** and authorization workflows on the frontend, securely handling access and refresh tokens with HTTP-only cookies and role-based access control.
- Co-developed a full-stack **Next.js** chat widget powered by a Retrieval-Augmented Generation (RAG) system, enabling users to connect their data sources and query data in real time via a conversational interface.
- Increased stakeholder confidence by writing end-to-end tests with **Playwright** in the CI/CD pipeline, publishing test results on GitHub Pages using the Allure Reports plugin.
- Optimized application performance by implementing lazy loading, code splitting, and memoization, significantly reducing load times and improving responsiveness across devices.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive user interface using **React**, achieving a **25% boost** in user engagement and accelerating development by 30% through scalable architecture.
- Enhanced the development workflow by introducing automated testing frameworks, including **Jest** and **Enzyme**, which led to a **20% decrease** in bug reports.
- Optimized frontend performance and load efficiency by identifying and resolving render bottlenecks using React Profiler and Lighthouse Audits, reducing bundle size by **30-40%** and achieving a **35% faster load time**.
- Established engineering standards for code quality, testing, and deployment across the team using ESLint, Prettier, Husky, Lint-staged, and **GitHub Actions**.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 frontend engineers to build a high-volume **bank Settlement Solution**, significantly enhancing transaction processing capabilities to handle thousands to millions of transactions daily, boosting transaction settlement rates by **80%**.
- Spearheaded the development of critical modules for the Settlement Solution, including MasterCard, VISA, Express-cash, and E-commerce modules, using **React** with Redux for state management and Axios for asynchronous API requests.
- Developed a real-time account reconciliation solution, boosting the reconciliation of daily transactions by **60%** through innovative transaction processing and data management strategies.
- Enhanced system performance and user experience by adopting the native browser EventSource API for real-time data streaming, replacing conventional socket.io methods for faster data updates.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **Node.js RESTful APIs** to power new features, focusing on testable, maintainable, and well-documented code.
- Translated business requirements into efficient **MongoDB** database models and schemas, collaborating closely with the business team.

- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent, intuitive user interface.
- Engineered a CI/CD pipeline for automated deployment of APIs to testing environments on Heroku and production servers on **AWS**.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed MongoDB database schemas and implemented them in **Node.js** for multiple applications.
- Worked with a team of 5 to develop SureEdu, a school management portal for school owners to manage staff, payroll, and student reports.
- Responsible for server-side web application logic as well as integration of the frontend.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis and corruption tracking.

- Architected and built the entire platform as an **Nx monorepo** managing 6 applications, seamlessly switching between **Next.js** frontends and **NestJS API** backends.
- Designed the **PostgreSQL 16** database schema with **Prisma v7** and wrote custom migration tooling, ensuring reliable data management for 700+ ingested documents.
- Built the document ingestion pipeline in **NestJS** and **TypeScript**, supporting PDF, XLSX, DOCX, and JSON extractors with zero ingestion errors across 37 states.
- Configured CI/CD with **GitHub Actions** for automated builds, **Playwright** end-to-end tests, and **Docker Compose** production deployment with health checks, memory limits, and 30s graceful shutdown.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science, 4.1 CGPA *Graduation Date: Sep 2019*
