SUMMARY

Full-stack capable frontend engineer with over eight years of professional experience building complex React applications, scalable UI architecture, and client-facing web platforms. Architected a production design system in React and Radix UI, maintained component libraries with Storybook, and shipped measurable performance wins through profiling, bundling, and CI-driven quality gates. Strong collaboration with backend and platform teams through REST APIs, Node.js and NestJS services, JWT flows, and release automation. Based in Berlin and motivated by regulated, data-driven product environments such as FinTech and index platforms.

CORE COMPETENCIES

- **Frontend:** React, TypeScript, Next.js, Vue.js (legacy migration), Redux, React Query, Radix UI, Tailwind CSS, Storybook, Vite ecosystem patterns
- **Quality & delivery:** Playwright, Jest, Enzyme, ESLint, Prettier, Husky, GitHub Actions, Docker, Lighthouse, accessibility-focused UI
- **Full-stack & APIs:** Node.js, NestJS, REST APIs, JWT and RBAC on the client, SSE and real-time patterns
- **Data & platform:** PostgreSQL, Prisma, MongoDB, FinTech and high-volume transaction UI experience, CI/CD and observability in shipping teams

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded migration of a clinical trial data connectivity product from a **Vue.js** web app to a **React-based Chrome extension**, while maintaining and extending the legacy Vue app until cutover.
- Architected a reusable **design system in React and Radix UI** to tighten accessibility, visual consistency, and developer velocity across products.
- Co-developed a full-stack **Next.js** chat widget powered by retrieval-augmented generation using OpenAI models, LangChain, Vercel AI SDK, and Chroma, including integration patterns suitable for external embedding.
- Implemented **JWT-based authentication** and authorization in the UI with HTTP-only cookies, role-based access control, protected routes, and close coordination with backend engineers on security and permissions.
- Improved performance through lazy loading, code splitting, image optimization, and CDN-friendly asset delivery, using **Lighthouse** and Chrome DevTools to find and remove bottlenecks.
- Introduced **Redux** and **React Query**, refactored class components to modern React, and raised stakeholder confidence with **Playwright E2E tests in CI**, Allure reports on GitHub Pages, and Slack links to test artifacts on every push.
- Mentored two junior developers (interns), reinforcing code review standards and hands-on delivery practices.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led implementation of a **React UI** that increased user engagement by **25%** and partnered with architects on scalable frontend structure, backend integration, and delivery practices that accelerated development by **30%**.
- Used **Storybook** to document components and stabilize change management across stakeholders and delivery cycles.
- Drove roughly **40% improvement** in React application performance through cache tuning and render profiling, and cut bundle size by 30-40% using rollup-plugin-visualizer and webpack-bundle-analyzer, supporting roughly **35% faster loads**.
- Introduced **Jest** and **Enzyme** for automated testing, contributing to a **20% drop** in bug reports, and standardized ESLint, Prettier, Husky, lint-staged, and **GitHub Actions** for CI.
- Optimized rendering using **React Profiler** and Lighthouse audits, and supported agile planning from requirements through estimation.
- Mentored junior engineers on frontend patterns, testing, and consistent UI quality.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Helped a three-person frontend team deliver a high-volume **bank settlement platform** handling large daily transaction volumes, contributing to an **80% boost** in settlement rates.
- Built Mastercard, Visa, express-cash, and e-commerce modules in **React with Redux, RxJS, and Axios** for resilient integrations.
- Implemented real-time account reconciliation experiences that increased daily reconciliation throughput by **60%** using strong transaction and data handling patterns.

- Adopted the native **EventSource API** for streaming updates instead of socket.io in several flows for faster, more responsive UIs, and built React dashboards with react-chartjs and Ant Design, including role and permission management via Redux Toolkit.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Delivered **Node.js REST APIs** with a focus on testable, documented endpoints aligned with product requirements.
- Translated Figma and product flows into reusable **React components** for a consistent interface.
- Owned **CI/CD** for API deployments to Heroku staging and **AWS** production, and mentored two interns across frontend and backend tasks.
- Collaborated on **MongoDB** data modeling with the business team to match operational needs.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Worked in a five-person team on SureEdu, a school management portal covering staff, student, and guardian workflows with **Node.js** and **MongoDB**-backed services.
- Owned server-side application logic and frontend integration, plus schema design, documentation, and verification of API endpoints and database routines.
- Converted user cases into database models and maintained technical documentation for multiple applications.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for budget analysis and transparency.

- Built an **Nx monorepo** with six applications including **NestJS APIs, Next.js web and admin apps**, document ingestion, marketing, and a Remotion-based video service, orchestrated with pnpm.
- Implemented production deployment with **Docker Compose, GitHub Actions, Playwright E2E suites**, health checks, and defined resource limits for API, ingestion, and database services.
- Delivered hybrid RAG search over PostgreSQL and **pgvector** with full-text BM25, reciprocal rank fusion, and reranking, plus **SSE streaming** for responsive chat UX.
- Shipped the citizen-facing **Next.js** app with React 19, Tailwind CSS v4, and numerous data visualizations, with SEO-oriented public pages and structured metadata.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
