SUMMARY

Frontend engineer with over eight years of professional experience building high-performance React and TypeScript applications, reusable component libraries, and rigorous test automation. Comfortable leading migrations to modern stacks, designing accessible UI systems, and partnering on APIs, auth, and data-heavy interfaces. Seeking to contribute deep hands-on expertise in component architecture, state management, performance tuning, and mentorship within a collaborative, quality-focused team.

CORE COMPETENCIES

- **Languages:** TypeScript, JavaScript (ESNext), HTML, CSS
- **Frameworks:** React, Next.js, Vue.js (maintenance and migration)
- **State and data:** Redux, React Query, Zustand, RxJS, REST, GraphQL
- **UI and accessibility:** Radix UI, Tailwind CSS, Storybook, design systems, WCAG-oriented patterns
- **Visualization:** Recharts, react-chartjs, performance-conscious charting in product UIs
- **Testing:** Playwright, Jest, Enzyme, Allure Reports, CI-integrated E2E
- **Quality and DX:** ESLint, Prettier, Husky, Lint-staged, GitHub Actions, Lighthouse, Chrome DevTools, React Profiler
- **Practices:** Code review, mentorship, agile delivery, cross-browser and responsive design

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting and transferring clinical trial sites' data to upstream EHR systems, migrating from a **Vue.js** web application to a **React Chrome extension**.
- Maintained and extended the existing Vue.js codebase during the migration, fixing bugs and shipping features in parallel with the React rebuild.
- Optimized application performance with **lazy loading, code splitting, and image optimization**, and improved responsiveness with responsive layouts, memoization, and efficient asset delivery, using **Lighthouse** and Chrome DevTools to find and fix bottlenecks.
- Implemented authentication and authorization on the frontend with **JWT-based flows, HTTP-only cookies, protected routes, role-based UI**, and close coordination with backend engineers on security and permissions.
- Introduced **Redux** and **React Query**, refactored legacy React from class to functional components, and streamlined the build pipeline to improve developer experience.
- Increased stakeholder confidence by writing end-to-end tests with **Playwright** in CI, publishing Allure Reports to GitHub Pages, and sending Slack notifications with test links on every push.
- Co-developed a full-stack **Next.js chat widget** powered by a RAG system using OpenAI, LangChain, the Vercel AI SDK, and Chroma, so users can embed the widget, connect data sources, and query data through a conversational UI.
- Architected a reusable **React and Radix UI design system** that improved UI consistency, accessibility, and delivery speed across products.
- Mentored a team of two junior developers (interns), with emphasis on code quality and growth.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led design and implementation of a **React UI** that helped achieve a **25% increase in user engagement**, working with architects on scalable frontend architecture, backend integration, and roughly **30% faster feature delivery**, using Redux, Zustand, and TypeScript.
- Introduced **Jest** and **Enzyme** and drove adoption, contributing to a **20% reduction** in reported bugs.
- Used **Storybook** to document components and align engineering with design and product in agile planning, user stories, and estimates.
- Delivered roughly **40% better React application performance** by improving caching, profiling with React Profiler and Lighthouse, and cutting bundle size by 30% to 40% using rollup-plugin-visualizer and webpack-bundle-analyzer, for about **35% faster loads**.
- Established team standards with ESLint, Prettier, Husky, Lint-staged, and GitHub Actions, reducing errors and improving CI reliability.
- Mentored junior engineers on frontend best practices, maintainable code, and consistent UI patterns across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Worked in a team of three frontend engineers on a high-volume bank settlement platform, helping raise transaction settlement rates by **80%** as processing scaled from thousands to millions of daily transactions.
- Built major modules, including MasterCard, VISA, Express-cash, and E-commerce flows, with **React, Redux, RxJS** for streaming, and **Axios** for API calls.
- Delivered a real-time account reconciliation experience that increased daily reconciliation throughput by **60%** through improved processing and data handling.
- Replaced a socket-style approach with the native **EventSource API** for real-time data streaming, improving responsiveness and update latency.
- Built data visualization dashboards with **React** and **react-chartjs**, with role and permission management via Redux Toolkit and Ant Design.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Designed database models with the business team and built **Node.js REST APIs** with clear structure and tests.
- Turned Figma designs into reusable **React** components for a consistent product UI.
- Operated a **CI/CD pipeline** deploying APIs to Heroku test environments and production on AWS.
- Mentored two interns across frontend and backend work.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Co-developed SureEdu, a school management portal, in a five-person team, covering staff, students, and guardians, attendance, exams, and reporting.
- Implemented MongoDB schemas and **Node.js** server logic, plus integration with the client application.
- Authored application documentation, tested APIs and custom database logic, and supported reliable releases.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for budget analysis and transparency.

- Owns the citizen-facing **Next.js** application in an **Nx monorepo** with six applications, using React 19, Tailwind CSS v4, and Recharts, including 22 interactive chart types generated from AI output, dark mode, responsive layouts, and URL state for shareable views.
- Implements real-time chat with **SSE**, token-aware context, and strong SEO for public pages through Open Graph metadata, JSON-LD, and SSR slugs.
- Runs **Playwright E2E tests** across web and mobile profiles in **GitHub Actions** alongside Docker-based deployment with health checks and defined resource limits.
- Shipped phone OTP and Telegram OAuth on the web client with session cookies, shareable public conversation pages with SSR, and a Telegram bot integrated with the product experience.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
