SUMMARY

Frontend Engineer with 8 years of professional experience delivering high-quality, client-facing web applications across healthcare, fintech, civic tech, and enterprise environments. Proven versatility across modern frontend frameworks including React, Next.js, and Vue.js, with a strong track record of building scalable component architectures, design systems, and performance-optimized interfaces. Experienced working in agile, international teams on consulting-style projects, with a collaborative mindset, strong communication skills, and a commitment to engineering excellence through automated testing (Jest, Playwright) and CI/CD best practices.

CORE COMPETENCIES

- **Frontend Frameworks:** React, Next.js, Vue.js, TypeScript, modern JavaScript (ESNext), Redux, Zustand, React Query, and RxJS.
- **UI & Styling:** Tailwind CSS, Radix UI, Ant Design, Storybook, responsive layouts, accessibility (WCAG/ARIA), and custom design systems.
- **Performance Optimization:** Code splitting, lazy loading, CDN strategies, Lighthouse, React Profiler, bundle analysis (Webpack/Rollup), and Core Web Vitals.
- **Testing & Quality:** Playwright, Jest, Cypress, Enzyme, Allure Reports, ESLint, Prettier, Storybook, and CI-driven QA.
- **Build Tools & Infrastructure:** Webpack, Vite, Rollup, Nx monorepos, Docker, GitHub Actions, CI/CD pipelines, and AWS (CloudFront, S3).
- **Backend & Data:** NodeJS, NestJS, REST APIs, PostgreSQL, MongoDB, Prisma, GraphQL, JWT authentication, and RBAC.
- **Leadership & Collaboration:** Agile/Scrum, mentorship, architecture reviews, cross-functional teamwork, and client-facing project delivery.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)

Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React Chrome extension**, optimizing workflows for clinical site integrations and enhancing user adoption across multiple stakeholders.
- Maintained and extended the existing **Vue.js** codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild, demonstrating fluency across both frameworks.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams.
- Optimized application performance by implementing **lazy loading, code splitting**, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools. Applied responsive layouts, memoization, and image optimization for consistent cross-device performance.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Implemented **JWT-based authentication** and **role-based access control** with **TypeScript**, using HTTP-only cookies for secure token handling and permission-based UI rendering in collaboration with backend engineers.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility.
- Co-developed a full-stack **Next.js chat widget** powered by a RAG system using OpenAI GPT models, LangChain, and Chroma vector database, enabling real-time conversational data querying.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence and code quality through regular code reviews and pair programming.

Descasio — Lagos, Nigeria (Hybrid)

Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with software architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience.
- Enhanced the development workflow by introducing **Jest** and **Enzyme** automated testing frameworks, leading to a **20% decrease** in bug reports and improved release confidence.

- Utilized **Storybook** for documenting React components, streamlining change management and supporting agile project management practices including user story estimation and sprint planning.
- Established engineering standards for code quality using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes across the team.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code and consistent design patterns across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, handling thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for asynchronous API requests.
- Built a real-time account reconciliation solution, boosting daily reconciliation efficiency by **60%** through innovative transaction processing and data management strategies.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface.
- Built dynamic data visualization dashboards using **React** and **react-chartjs** with **Redux Toolkit** and **Ant Design** UI for streamlined user role and permission management.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient database models and schemas in **MongoDB**, collaborating closely with the business team to ensure technical solutions aligned with project goals.
- Developed **NodeJS RESTful APIs** to power new features, focusing on testable, maintainable, and well-documented code for seamless frontend integration.
- Transformed user journeys and **Figma** designs into reusable **React** components, ensuring a consistent and intuitive user interface across the application.
- Engineered a **CI/CD pipeline** for automated deployment of APIs to testing environments on **Heroku** and production servers on **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and structured task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing 15+ **REST API** endpoints for user management, payroll processing, and attendance tracking across multiple client-facing applications.
- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing all functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications**: NestJS API backend, **Next.js** citizen-facing web app with **React 19** and 22 interactive chart types (Recharts), Next.js admin dashboard, NestJS document ingestion pipeline, Next.js marketing landing page, and a Remotion video generation service.
- Built the citizen-facing frontend with **React 19**, **Tailwind CSS v4**, and **Recharts**, featuring responsive mobile layouts, dark mode, URL state management, and 22 auto-generated interactive chart types rendered inline from AI responses.
- Configured CI/CD with **GitHub Actions** for automated builds, **Playwright** E2E tests across 4 test projects, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
