SUMMARY

Senior Frontend Engineer with 8 years of professional experience building high-impact web applications across fintech, healthcare, and enterprise environments. Proven expertise in React, TypeScript, and modern frontend architecture, with hands-on experience leading a large-scale framework migration (Vue.js to React) and building reusable design systems that improve UI consistency, accessibility, and developer velocity. Strong proficiency in HTML, CSS, and responsive design, with a track record of driving performance optimization, automated testing, and engineering quality standards within cross-functional teams.

CORE COMPETENCIES

- **React & Frontend Architecture:** React, Next.js, Vue.js, scalable component systems, design systems, large-scale framework migrations, SSR/SSG, and monorepos (Nx, Turborepo).
- **HTML, CSS & UI:** Semantic HTML, pure CSS, responsive layouts, accessibility (WCAG, ARIA), Radix UI, Ant Design, Storybook, and cross-browser compatibility.
- **State Management:** Redux, Redux Toolkit, React Query, Zustand, RxJS, and efficient data flow patterns.
- **Testing & Quality:** Playwright, Jest, Enzyme, Cypress, Storybook, Allure Reports, ESLint, Prettier, Husky, and CI-driven QA.
- **Performance & Observability:** Core Web Vitals, code splitting, lazy loading, CDN strategies, Lighthouse, React Profiler, bundle analysis, Sentry, and Datadog RUM.
- **Tooling & Infrastructure:** TypeScript, JavaScript (ESNext), Webpack, Vite, Rollup, GitHub Actions, CI/CD pipelines, and Docker.
- **Leadership & Collaboration:** Cross-functional teamwork, peer code reviews, mentorship, architecture reviews, Agile/Scrum, and technical direction.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)

Frontend Engineer *May 2023 - Present*

- Spearheaded a **large-scale framework migration** of the main clinical trial data product from a **Vue.js** web application to a **React** Chrome extension, redesigning the architecture, rewriting components, and optimizing workflows for clinical site integrations.
- Maintained and extended the existing **Vue.js** codebase during the migration period, shipping bug fixes and new features in parallel with the React rebuild to ensure zero disruption to end users.
- Architected a **reusable design system** in **React** and **Radix UI**, enforcing consistent styling, **accessibility (WCAG)** compliance, and developer velocity across multiple product teams.
- Optimized application performance by implementing **lazy loading, code splitting**, dynamic imports, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy **class components to functional components** and streamlining data flow across the application.
- Implemented **JWT-based authentication** and **role-based access control** in the React frontend with **TypeScript**, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** on GitHub Pages, and configuring Slack notifications for build quality visibility.
- Mentored a team of two junior developers (interns), conducting code reviews and fostering a culture of technical excellence and high-quality standards.

Descasio Lagos, Nigeria (Hybrid)

Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with software architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience.
- Enhanced development workflow by introducing **Jest** and **Enzyme** automated testing frameworks, leading to a **20% decrease** in bug reports and improving release confidence.
- Utilized **Storybook** for documenting React components, streamlining change management and ensuring clear communication of component APIs and design patterns.

- Established engineering standards for code quality, testing, and deployment using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers on frontend best practices, conducting peer reviews and fostering high-quality, maintainable code across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, processing thousands to millions of daily transactions and boosting settlement rates by **80%** for a major financial institution.
- Developed critical payment processing modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for asynchronous API requests.
- Built a real-time account reconciliation solution, boosting daily transaction reconciliation by **60%** through innovative data processing and management strategies.
- Adopted the native browser **EventSource API** for real-time data streaming, replacing conventional socket.io methods for faster updates and a more responsive user interface.
- Built dynamic data visualization dashboards using **React** and **react-chartjs**, managing user roles and permissions with **Redux Toolkit** and **Ant Design** UI components.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Transformed user journeys and Figma designs into reusable **React** components, ensuring a consistent, intuitive user interface aligned with business requirements.
- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models and schemas, focusing on testable and well-documented code.
- Engineered a **CI/CD pipeline** for automated deployment to **Heroku** (testing) and **AWS** (production), and mentored two interns through frontend and backend projects.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, developing user use cases, and converting business requirements into database schemas.
- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications** including 3 **Next.js** frontends (citizen-facing web app with **React 19**, admin dashboard, marketing landing page) with responsive mobile layouts, dark mode, and **22 interactive chart types** using Recharts.
- Built the **Next.js** citizen-facing frontend with **React 19**, featuring URL state management, **SSR** for shareable public conversations with SEO optimization (Open Graph metadata, JSON-LD schema, slug-based URLs), and responsive design across desktop and mobile viewports.
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** end-to-end tests across 4 test projects (desktop Chrome, mobile Pixel 5), and **Docker Compose** production deployment with multi-stage Dockerfiles and health checks.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
