SUMMARY

Senior Frontend Engineer with 8 years of professional experience building high-performance, user-centric web applications for B2B and B2C platforms across healthcare, fintech, and enterprise environments. Deep expertise in React, TypeScript, and Next.js, with hands-on experience integrating REST APIs and real-time communication protocols (SSE, EventSource, WebSockets) to power responsive, data-driven interfaces. Proven track record of leading frontend architecture, optimizing application performance, building reusable design systems, and mentoring junior developers while shipping fast and maintaining code quality.

CORE COMPETENCIES

- **Frontend Frameworks:** React, Next.js, Vue.js, TypeScript, modern JavaScript (ESNext), Redux, Zustand, React Query, and RxJS.
- **Real-Time & API Integration:** REST APIs, Server-Sent Events (SSE), EventSource API, WebSockets, JWT authentication, RBAC, and Axios.
- **UI & Design Systems:** Tailwind CSS, Radix UI, Ant Design, Storybook, responsive layouts, accessibility (WCAG), and cross-device optimization.
- **Performance & Observability:** Core Web Vitals, Lighthouse, code splitting, lazy loading, CDN strategies, bundle analysis, Sentry, and Datadog RUM.
- **Testing & Quality:** Playwright, Jest, Cypress, Enzyme, Allure Reports, ESLint, Prettier, and CI-driven QA pipelines.
- **Build Tools & Infrastructure:** Webpack, Vite, Rollup, Nx monorepos, Docker, GitHub Actions, CI/CD pipelines, and AWS (CloudFront, S3).
- **Data Visualization:** Recharts, react-chartjs, dynamic dashboards, and interactive chart systems.
- **Leadership:** Technical architecture reviews, junior developer mentorship, Agile/Scrum, cross-functional collaboration, and product-minded development.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)
Frontend Engineer — *May 2023 - Present*

- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React Chrome extension**, optimizing workflows for clinical site integrations and enhancing adoption across B2B stakeholders.
- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams.
- Optimized application performance by implementing **lazy loading, code splitting, dynamic imports**, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools.
- Implemented **JWT-based authentication** and **role-based access control** with **TypeScript** and **React Query**, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Introduced **Redux** for state management and **React Query** for server-state caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, and Chroma vector database, enabling users to query data in **real time** via a conversational interface.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility.
- Mentored a team of **two junior developers** (interns), fostering a culture of technical excellence, code quality, and ownership.

Descasio — Lagos, Nigeria (Hybrid)
Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with software architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience.
- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks, leading to a **20% decrease** in bug reports and more reliable releases.
- Utilized **Storybook** for documenting React components, streamlining change management and supporting agile development practices across the team.

- Established engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes.
- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code and consistent design across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, handling thousands to millions of daily transactions and boosting transaction settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for reactive data streaming, and **Axios** for asynchronous API requests.
- Built a **real-time account reconciliation solution**, boosting daily reconciliation by **60%** through innovative transaction processing and data management strategies.
- Adopted the native browser **EventSource API** for **real-time data streaming**, replacing conventional socket.io methods for faster data updates and a more responsive, low-latency interface.
- Built dynamic **data visualization dashboards** using **React** and **react-chartjs**, streamlining management of user roles and permissions with **Redux Toolkit** and **Ant Design** UI.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models and schemas, focusing on testable, maintainable, and well-documented code.
- Transformed Figma designs into reusable **React** components and engineered a **CI/CD pipeline** for automated deployment to **Heroku** and **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance, code reviews, and task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered platform for Nigerian budget analysis. 700+ documents, 708K+ vector embeddings, 37 states.

- Architected the entire platform as an **Nx monorepo** managing **6 applications**: NestJS API backend, **Next.js** citizen-facing web app with **22 interactive chart types** (Recharts), Next.js admin dashboard, NestJS document ingestion pipeline, Next.js marketing landing page, and a Remotion video generation service.
- Implemented **SSE streaming** for real-time chat responses with **15s keepalive heartbeats** to prevent reverse proxy timeouts, token-budgeted context management, and conversation summarization.
- Built the **Next.js** citizen-facing frontend with **React 19**, **Tailwind CSS v4**, and **Recharts**, featuring dark mode, URL state management, and **responsive mobile layouts** optimized for cross-device use.
- Configured CI/CD with **GitHub Actions** for automated builds, **Playwright** end-to-end tests across 4 test projects, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
