SUMMARY

Senior Frontend Developer with 8 years of experience building customer-facing web platforms using React, Next.js, and TypeScript across healthcare, fintech, and enterprise environments. Specialized in frontend architecture, reusable design systems, and performance optimization with a strong focus on Clean Code principles, automated testing, and agile delivery. Experienced integrating AWS cloud services, implementing SEO and analytics features, and collaborating closely with UX/UI design and backend teams to deliver outstanding digital experiences at scale.

CORE COMPETENCIES

- **Frontend Frameworks:** React, Next.js (SSR/SSG/ISR), TypeScript, modern JavaScript (ESNext), and Vue.js.
- **Design Systems & UI:** Reusable component libraries, Radix UI, Tailwind CSS, Storybook, Ant Design, and accessibility (WCAG/ARIA).
- **Performance & SEO:** Core Web Vitals, Lighthouse auditing, code splitting, lazy loading, CDN strategies, bundle analysis, Open Graph, JSON-LD, and SSR-based SEO.
- **Cloud & Infrastructure:** AWS (CloudFront, S3), Docker, GitHub Actions, CI/CD pipelines, and Vercel.
- **Testing & Code Quality:** Playwright, Jest, Cypress, ESLint, Prettier, Husky, Lint-staged, Storybook, and Allure Reports.
- **State Management & Data:** Redux, Redux Toolkit, Zustand, React Query, RxJS, and REST/GraphQL API integration.
- **Build Tools:** Webpack, Vite, Rollup, Nx monorepos, Turborepo, and pnpm workspaces.
- **Leadership & Methods:** Agile/Scrum, technical architecture reviews, mentorship, TDD/BDD, and cross-functional collaboration.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, improving UI consistency, accessibility (WCAG), and developer velocity across multiple product teams.
- Spearheaded the redesign of the main clinical trial data platform, migrating from a **Vue.js** web application to a **React**-based Chrome extension, collaborating closely with UX/UI design and backend teams to create outstanding user experiences.
- Optimized application performance by implementing **lazy loading, code splitting**, dynamic imports, and **CDN asset delivery** via **AWS CloudFront**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, Vercel AI SDK, and Chroma vector database, enabling users to query data in real time via a conversational interface.
- Implemented **JWT-based authentication** and **role-based access control** in Next.js with **TypeScript** and **React Query**, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline** with **GitHub Actions**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence, **Clean Code** practices, and high code quality standards.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with software architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience.
- Established **Clean Code** engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes across the team.
- Enhanced development workflow by introducing **Jest** and **Enzyme** automated testing frameworks, leading to a **20% decrease** in bug reports.
- Utilized **Storybook** for documenting React components, streamlining change management and supporting **agile** development practices including user story planning, estimation, and sprint delivery.

- Mentored junior engineers on frontend best practices, fostering high-quality, maintainable code and consistent design across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, handling thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for API integration.
- Built a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing and data management strategies.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface.
- Built dynamic **data visualization dashboards** using **React** and **react-chartjs** with **Redux Toolkit** and **Ant Design** UI for managing user roles and permissions.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models and schemas, collaborating closely with the business team.
- Transformed Figma designs into reusable **React** components and engineered a **CI/CD pipeline** for automated deployment to **Heroku** and **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and structured task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing REST API endpoints for multiple client-facing applications.
- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to NodeJS backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the platform as an **Nx monorepo** managing **6 applications** including 3 **Next.js** frontends (citizen-facing web app with 22 interactive chart types via Recharts, admin dashboard, and marketing landing page) with **React 19**, **Tailwind CSS v4**, dark mode, and responsive mobile layouts.
- Implemented **SSR**-based **SEO optimization** with Open Graph metadata, JSON-LD FAQPage schema, slug-based URLs, and shareable public conversation pages, maximizing discoverability and search engine indexing.
- Built the admin dashboard with user management, usage **analytics**, ingestion tracking, system banner management, and feedback review capabilities.
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** E2E tests across 4 test projects, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
