arinzeogbo@gmail.com | LinkedIn

SUMMARY

Senior Frontend Engineer with 8 years of professional experience building scalable, cross-platform web products for healthcare, fintech, and civic tech. Deep expertise in React, TypeScript, and Redux, with a proven record architecting reusable design systems, raising the testing bar with Playwright and Jest, and shipping reliable releases through CI/CD pipelines. Comfortable owning state-management strategy, build/release pipelines, and component-library evolution while mentoring mid and junior engineers. Strong written and verbal English, accustomed to globally distributed teams, and pragmatic about balancing code quality with shipping velocity.

CORE COMPETENCIES

- **Frameworks & Languages:** React 18+, Next.js, TypeScript (3+ years), JavaScript (ES6+), Vue.js (legacy maintenance), HTML5, CSS3.
- **State Management:** Redux and Redux Toolkit (5+ years), Zustand, Jotai, React Query, RxJS, Context API.
- **UI & Design Systems:** Reusable design systems with Radix UI and Tailwind CSS, Storybook component documentation, accessibility (WCAG, ARIA).
- **Automated Testing:** Playwright end-to-end, Jest, Enzyme, Cypress, Allure Reports, integrated into CI/CD as a normal part of feature work.
- **Build & Release:** Webpack, Rollup, Vite, Nx and Turborepo monorepos, GitHub Actions CI/CD, Docker, Vercel, AWS.
- **Performance:** Lighthouse, Chrome DevTools, React Profiler, code splitting, lazy loading, bundle analysis (rollup-plugin-visualizer, webpack-bundle-analyzer).
- **Leadership & Process:** Architecture reviews, mentorship of mid and junior engineers, code-review standards (ESLint, Prettier, Husky), Agile/Scrum, cross-functional collaboration.

WORK EXPERIENCE

Genentech (Roche) San Francisco, CA (Remote)
Frontend Engineer *May 2023 - Present*

- Spearheaded the redesign of the main product for connecting clinical trial sites to upstream EHR systems, migrating from a legacy **Vue.js** web application to a **React** Chrome extension while continuing to ship features and bug fixes on the legacy app in parallel during the migration window.
- Architected a reusable **design system** in **React**, **Radix UI**, and **Tailwind CSS**, lifting UI consistency, accessibility (WCAG), and developer velocity across multiple cross-functional product teams.
- Introduced **Redux** for global state management and **React Query** for request caching, refactored legacy class components to functional components with hooks, and optimized the build pipeline for faster local feedback and CI throughput.
- Implemented **JWT-based authentication** and role-based access control on the frontend with HTTP-only cookie handling, secure token refresh flows, and permission-driven UI rendering, partnering with backend engineers to align on the auth strategy.
- Optimized application performance with lazy loading, code splitting, image optimization, memoization to minimize re-renders, and CDN asset delivery, using **Lighthouse** and Chrome DevTools to identify and resolve bottlenecks.
- Raised stakeholder confidence in releases by writing **Playwright** end-to-end tests in the **GitHub Actions** CI/CD pipeline, publishing test results on GitHub Pages with the **Allure Reports** plugin, and shipping Slack notifications with links to the latest results on every push.
- Co-developed a full-stack **Next.js** chat widget powered by a Retrieval-Augmented Generation pipeline using **OpenAI**, **LangChain**, Vercel AI SDK, and Chroma, enabling users to embed the widget on external sites and query their own data through a conversational interface.
- Mentored two junior developers (interns) through code reviews, pair programming, and architecture walkthroughs, fostering a culture of clean code, robust testing, and pragmatic engineering judgment.

Descasio Lagos, Nigeria (Hybrid)
Senior Frontend Developer *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface that delivered a **25% boost in user engagement**, partnering with software architects on a scalable frontend architecture and seamless backend integration that accelerated development by **30%**.
- Drove a **40% improvement** in React application performance by optimizing caching strategies, then reduced bundle size by **30-40%** using rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time** with smoother runtime behavior across devices.
- Profiled render bottlenecks with **React Profiler** and **Lighthouse Audits** to drive targeted memoization, code splitting, and component-tree restructuring across high-traffic surfaces.

- Enhanced the team's automated-testing posture by introducing **Jest** and **Enzyme**, treating tests as a normal part of feature work, leading to a **20% decrease** in production bug reports.
- Built and curated a **Storybook** library to document React components, streamline change management, and accelerate design-to-code handoff with product and design partners during agile delivery.
- Established engineering standards across the frontend team using **ESLint**, **Prettier**, **Husky**, **Lint-staged**, and **GitHub Actions**, hardening code review and reducing CI/CD failures.
- Mentored junior frontend engineers through code reviews, architecture walkthroughs, and pairing on tricky bugs, building a culture of opinionated-but-pragmatic code quality.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Played a pivotal role in a team of 3 frontend engineers building a high-volume bank Settlement Solution that scaled from thousands to millions of daily transactions, boosting transaction settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React** with **Redux** for state management, **RxJS** for data streaming, and **Axios** for asynchronous API requests.
- Built a real-time account reconciliation tool that lifted daily reconciliation throughput by **60%** through redesigned transaction-processing flows and resilient error handling on the frontend.
- Replaced socket.io-based streaming with the native browser **EventSource API** for real-time data updates, simplifying the stack and producing a more responsive interface for operations users.
- Built dynamic data-visualization dashboards using **React** and **react-chartjs**, with role-management screens powered by **Redux Toolkit** and **Ant Design**.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Translated business requirements into efficient **MongoDB** schemas, partnering with the business team to ensure technical solutions matched real workflows.
- Built **NodeJS** RESTful APIs to power new features with a focus on testable, maintainable, and well-documented code.
- Transformed user journeys and Figma designs into reusable **React** components for a consistent, intuitive interface.
- Engineered a **CI/CD** pipeline that automated deployments to Heroku testing environments and AWS production, reducing manual release overhead.
- Mentored two interns through frontend and backend tickets, providing structured technical guidance and code reviews.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Designed **MongoDB** schemas and implemented server-side logic in **NodeJS** for multiple client applications, integrating closely with the JavaScript frontend.
- Worked in a team of 5 to build **SureEdu**, a school-management portal covering staff payroll and attendance, student records, exams, and guardian communications.
- Owned end-to-end feature delivery from user-case definition through schema design, REST API endpoints, and integration tests.
- Authored documentation for each application detailing functionality, capabilities, and integration points to support handover and onboarding.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Architected the platform as an **Nx monorepo** covering 6 applications: **NestJS** API, **Next.js** citizen-facing app, Next.js admin dashboard, NestJS ingestion pipeline, marketing landing page, and a Remotion video service, all with **pnpm** workspaces.
- Built the citizen-facing frontend with **React 19**, **TypeScript**, **Tailwind CSS v4**, and **Recharts**, including 22 interactive chart types auto-generated from AI responses, dark mode, URL state management with nuqs, and responsive mobile layouts.
- Implemented **SSE streaming** with 15s keepalive heartbeats, token-budgeted context windows, and conversation summarization for real-time chat without reverse-proxy timeouts.
- Configured **GitHub Actions** CI/CD with **Playwright** end-to-end tests across 4 projects (web auth, dashboard auth, desktop Chrome, mobile Pixel 5), shipping production via **Docker Compose** with health checks, memory limits, and graceful shutdown.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
