SUMMARY

Senior Frontend Engineer with 8 years of experience shipping high-quality, user-facing web products across healthcare, fintech, analytics, and civic tech. Deep expertise in **TypeScript**, **React**, and **Tailwind CSS**, with a proven track record of architecting reusable design systems, building pixel-perfect component libraries, and delivering polished interfaces in fast-paced startup and enterprise environments. Passionate about visual quality, performance optimization, and frontend craft, with strong ownership from scoping through production delivery.

CORE COMPETENCIES

- **Frontend Architecture:** Scalable component systems, design systems (Radix UI, Storybook), monorepos (Nx, Turborepo), SSR/SSG, and micro-frontends.
- **Languages & Frameworks:** TypeScript, modern JavaScript (ESNext), React, Next.js, Vue.js, and NodeJS.
- **Styling & UI:** Tailwind CSS, CSS3, semantic HTML, Radix UI, Ant Design, responsive layouts, WCAG accessibility, and Figma-to-code workflows.
- **State Management & Data:** Redux, Redux Toolkit, Zustand, React Query, RxJS, and REST/GraphQL APIs.
- **Testing & Quality:** Playwright, Jest, Cypress, Storybook, Allure Reports, ESLint, Prettier, and CI-driven QA.
- **Performance & Tooling:** Core Web Vitals, code splitting, Lighthouse, bundle analysis (Webpack, Rollup, Vite), CDN strategies, and Sentry/Datadog RUM.
- **DevOps & Infrastructure:** GitHub Actions, CI/CD pipelines, Docker, AWS (CloudFront, S3), Vercel, and Nx monorepo orchestration.
- **Leadership:** Technical direction, architecture reviews, mentorship, Agile/Scrum, and product-minded development.

WORK EXPERIENCE

Genentech (Roche) — San Francisco, CA (Remote)

Frontend Engineer — *May 2023 - Present*

- Architected a **reusable design system** in **React** and **Radix UI** with **Tailwind CSS**, delivering accessible (WCAG-compliant), consistent UI components that improved developer velocity and visual consistency across multiple product teams.
- Spearheaded the redesign of the main clinical trial data product, migrating from a **Vue.js** web application to a **React** Chrome extension with **TypeScript**, optimizing workflows for clinical site integrations and enhancing user adoption.
- Optimized application performance by implementing **lazy loading, code splitting, dynamic imports**, and **CDN asset delivery**, reducing load times significantly as measured via **Lighthouse** and Chrome DevTools profiling.
- Maintained and extended the existing **Vue.js** codebase during the migration period, fixing bugs and shipping features in parallel with the React rebuild to ensure continuous product delivery.
- Introduced **Redux** for state management and **React Query** for request caching, refactoring legacy class components to functional components and streamlining data flow across the application.
- Implemented **JWT-based authentication** and **role-based access control** with **TypeScript** and **React Query**, using HTTP-only cookies for secure token handling and permission-based UI rendering.
- Increased release reliability by integrating **Playwright end-to-end tests** into the **CI/CD pipeline**, automating reporting with **Allure Reports** on GitHub Pages and configuring Slack notifications for build quality visibility.
- Co-developed a full-stack **Next.js** chat widget powered by a RAG system using OpenAI GPT models, LangChain, Vercel AI SDK, and Chroma vector database, enabling real-time conversational data queries.
- Mentored a team of two junior developers (interns), fostering a culture of technical excellence, code quality, and attention to visual detail.

Descasio — Lagos, Nigeria (Hybrid)

Senior Frontend Developer — *May 2021 - Mar 2023*

- Led the design and implementation of an intuitive **React** user interface, achieving a **25% boost in user engagement** and collaborating with software architects to create a scalable frontend architecture that accelerated development by **30%**.
- Optimized frontend performance by profiling render bottlenecks with **React Profiler** and **Lighthouse**, reducing bundle size by **30-40%** through rollup-plugin-visualizer and webpack-bundle-analyzer, achieving a **35% faster load time**.
- Drove a **40% improvement** in application performance by optimizing caching mechanisms across the React application, significantly boosting speed and user experience across devices.
- Utilized **Storybook** for documenting and cataloging **React components**, streamlining the component library, supporting design-development alignment, and ensuring visual consistency across the product.

- Enhanced development workflow by introducing **Jest** and **Enzyme** testing frameworks, leading to a **20% decrease** in bug reports and improved release confidence.
- Established engineering standards using **ESLint, Prettier, Husky, Lint-staged**, and **GitHub Actions**, reducing errors and accelerating CI/CD processes across the team.
- Mentored junior engineers on frontend best practices, component architecture, and visual polish, fostering high-quality, maintainable code across projects.

ActivEdge Technologies Lagos, Nigeria
Senior React Developer *Oct 2019 - Sep 2021*

- Built a high-volume **bank Settlement Solution** in a team of 3 frontend engineers, handling thousands to millions of daily transactions and boosting settlement rates by **80%**.
- Developed critical payment modules (MasterCard, VISA, Express-cash, E-commerce) using **React**, **Redux**, **RxJS** for real-time data streaming, and **Axios** for asynchronous API requests.
- Built dynamic **data visualization dashboards** using **React** and **react-chartjs**, streamlining management of user roles and permissions with **Redux Toolkit** and **Ant Design** UI components.
- Adopted the native **EventSource API** for real-time data streaming, replacing socket.io for faster updates and a more responsive interface across the application.
- Built a real-time account reconciliation solution, boosting daily reconciliation by **60%** through innovative transaction processing and data management strategies.

Founders Lair Beijing, China (Remote)
Full Stack Engineer (Contract) *Oct 2020 - Feb 2021*

- Transformed user journeys and **Figma** designs into reusable **React** components, ensuring a consistent, pixel-perfect user interface aligned with design specifications.
- Developed **NodeJS RESTful APIs** and translated business requirements into efficient **MongoDB** database models and schemas for the platform backend.
- Engineered a **CI/CD pipeline** for automated deployment of APIs to testing environments on **Heroku** and production servers on **AWS**.
- Mentored two interns through frontend and backend projects, providing technical guidance and structured task management.

SureTrade Business Solutions Nigeria
Frontend Developer *Mar 2018 - Oct 2019*

- Developed **SureEdu**, a school management portal in a team of 5, handling staff payroll and attendance tracking, student records (exams, reports, attendance), and guardian communications.
- Designed **MongoDB** database schemas and implemented server-side logic in **NodeJS**, building and testing **REST API** endpoints for multiple client-facing applications.
- Responsible for full-stack integration, connecting the **JavaScript** frontend to **NodeJS** backend services, developing user use cases, and converting business requirements into database schemas and models.
- Devised comprehensive documentation for each application, detailing functions, capabilities, and features. Tested user-defined functions, triggers, and API endpoints to ensure reliability.

PROJECTS

OurNigeria ournigeria.ng
Senior Engineer *Feb 2026 - Present*

AI-powered Nigerian budget analysis and corruption tracking platform. 700+ budget documents, 708K+ vector embeddings, 37 states.

- Built the **Next.js** citizen-facing frontend with **React 19**, **Tailwind CSS v4**, and **Recharts**, featuring **22 interactive chart types** auto-generated from AI responses, dark mode, URL state management with nuqs, and responsive mobile layouts.
- Architected the entire platform as an **Nx monorepo** managing **6 applications**: NestJS API backend, Next.js citizen-facing web app, Next.js admin dashboard, NestJS document ingestion pipeline, Next.js marketing landing page, and a Remotion video generation service.
- Built the admin dashboard with user management, usage analytics, ingestion tracking, system banner management, and feedback review capabilities using **React 19** and **Tailwind CSS v4**.
- Configured **CI/CD** with **GitHub Actions** for automated builds, **Playwright** E2E tests across 4 test projects, and **Docker Compose** production deployment with multi-stage Dockerfiles, health checks, and memory limits.

EDUCATION

University of Nigeria Nsukka, Enugu
BSc Computer Science - 4.1 CGPA *Graduation Date: Sep 2019*
